GRAND SLAM® BLUEWATER EXTRA HARD MONOFILAMENT LEADER

Grand Slam® Bluewater Extra Hard Monofilament Leader is the ultimate leader material for use in situations requiring extreme tensile strength and abrasion resistance. Its extra-hard outer layer stands up to heavy abrasion and is stiffer than standard nylon leader material. It's the perfect choice when you need chafe-resistant protection against billfish of all sizes.

Grand Slam Bluewater Extra Hard Monofilament Leader

GRAND SLAM® FLUOROCARBON COATED LINE

100% Copolymer

Grand Slam Fluorocarbon Coated fishing line is an extra strong, 100% copolymer with a fluorocarbon outer coating. The line is long casting and can be used in any water conditions. The Clear color is a top choice when visibility is a concern, such as fishing in clear shallow waters or in top water. Made from the highest quality copolymer, Grand Slam Fluorocarbon Coated is extremely supple and easy to cast using bait casting and spinning reels. The line is ultra manageable, easy to knot and delivers high knot strength and abrasion resistance.

TRIPLE FISH 100% FLUOROCARBON LEADER

Rookies and veterans of fluorocarbon will immediately recognize the outstanding value of Triple Fish. This European-grade of 100% polyvinylidene fluoride has all the qualities of fluorocarbon that anglers have come to appreciate, especially the near invisibility underwater and high abrasion resistance, without as high of a price tag. If you're looking for a good quality, medium-supple fluorocarbon at a great price, then Triple Fish is for you! Triple Fish fluorocarbon is made from 100% polyvinylidene fluoride which closely matches the light refractivity of water and is virtually invisible underwater. It is heavier than monofilament so it has a faster sink rate. And it is also more abrasion resistant than mono, so it stands up well to chaffing and basic wear-and-tear.

**NOW AVAILABLE IN
BLUE AND PINK!**

- **VIRTUALLY INVISIBLE UNDERWATER**
- **FASTER SINK RATE THAN MONO**
- **ABRASION RESISTANT**

TITANIUM SURFSTRAND®

Bare 1x7 Titanium Leader Wire

Titanium Surfstrand is an uncoated, 1x7 super-elastic leader wire that stretches to absorb the strike of a fish - then snaps back and recovers during the hook-set!

This wire is made with a special blend of Titanium alloy wire and engineered to deliver tremendous strength along with dramatic kink resistance. Fish with confidence knowing this is among the highest quality leader wire available. Use Titanium Surfstrand for the best bite protection, flexibility, and unmatched kink resistance! Made in USA by AFW.

PLANERS

The AFW Planer is an innovative and precisely balanced piece of fishing gear. A lead weight acts as a keel and balance to keep the planer running straight at controlled depths. When the planer is in the water in diving position, water pressure against the blade forces the planer down. When a fish strikes, the balance is changed. The planer then trips and produces a slight upward drag, which allows you to fight your fish rather than a heavy lead sinker.

Planers

Size No.	Finish	Depth ft	Part #

MORTICIAN'S BAIT RIGGING NEEDLE

Don't be frightened by the name, these strong stainless steel bait rigging needles have triangular razor-sharp points that easily penetrate through baits and plastics. The streamlined eye is easy to thread and won't make large holes in your bait. Use to bridle and rig live bait and ballyhoo. Great for use with AFW Rigging Floss and waxed thread.

Billy Baits™

BILLY WITCH™

Weight: 0.25 oz (0.007 kg), Length: 6.5 in (16.5 cm)

The chrome / brass head is weighted just enough to keep the bait down. Nylon hair is hand tied with right amount of hair not to hide the bait and strip of mylar to provide a flash. The hole is large enough for a Ballyhoo bill and possible to slide over the top of your leader for quick change. Troll between 2 to 8 knots.
