## **SPIN-N-BEAD INSTRUCTIONS**

## Artistic Wire

Place ample Seed Beads (or other small beads) in the bowl of the Spin-N-Bead Jr (206A-410). Place stringing material (for Seed Beads WildFire is a great option). Spin the Spin-N-Bead counter-clockwise and dip the tip of the Curved Big Eye Needle into the

pinning beads. Make sure not to touch the tip of the needle anywhere except into the spinning beads. Holding the needle parallel with your work surface is better and will allow more beads to load.

Once you have some beads on, remove the needle from the Spin-N-Bead Jr, if making a pattern count the number of beads you need then dump any remaining beads from the tip of the needle back into the Spin-N-Bead bowl. Push the counted (or not) Seed Beads onto the Wildfire.

\*\*Placement of the needle is crucial when using the Spin-N-Bead Jr. Make sure the tip of the needle does not touch the inside or bottom of the bowl. The needle needs to only have the tip in the spinning beads to find the hole and magically load the beads\*\*

## **NECKLACE INSTRUCTIONS**

**Beadalon** 

If making a pattern place the Quick Change Tray (206A-420) over the Spin-N-Bead Jr. then spin the same as before (with a different color of seed beads) then lower the Big Eye Curved Needle down and into the spinning beads and watch them load.

## \*\*If you are a lefty hold the needle in your left hand and spin CLOCKWISE\*\*

Artistic Wire

Remove the needle to find your cache of strung beads then count out the number of beads (if you are making a pattern) then dump the excess back into the Quick Change Tray. Push the strung beads from the needle onto the WildFire, then remove the Quick Change Tray from the Spin-N-Bead and continue on with your pattern.
